1. General Information

1.1. System Overview

The IT system to centralize the export certification process, in order to monitor and support the issuance of certificates, it is set up as a centralized system, with database and applications at central level, to be used at KEPHIS local offices and in the private sector (exporters and their shipping agents), having the role to entry and consult the data in and from the system based on the rights granted to each one.

The certification process is coordinated from a KEPHIS Headquarters through KEPHIS offices geographically distributed throughout the country, including exit and entry points. According with the above scheme there are more levels mentioned below in the document and types of information delivers/consumers. All information will be stored in a central relational database. The information from this database will be entered and accessed through a software application. The application will be available on the web (Internet), being the most accessible environment. The user interface will be friendly and easy to use, and will be accessible in the English language. The informational flow will be managed within the system presented in the included scheme.

The security of the system will be assured by access rights. The access to the application will be done after a preliminary identification and authentication (user/password and digital certificate). Within the application are going to be defined more no of roles. The access to the data will be restricted according with the role attributed to each user or group of users. Current existing system has a special interface module with other external applications from the KEPHIS (Sonara, Billing, Laboratory information Management System) via web service. This web service interface has been moved and a middleware Database Table is used for communication with financial system.

2. Getting Started

The client/employee can start the Application by typing the URL mentioned by the Administrator. Following Login Page will be displayed. Here enter following details

2.1. For Client:

VISION

The lead regulator and facilitator of globally competitive agriculture

MISSION

To provide a science-based regulatory service by assuring quality of agricultural inputs and produce to promote food security and sustainable development.

WHAT IS ELECTRONIC CERTIFICATION SYSTEM

The Electronic Certification System (ECS) system is a Business to Government and Government to Government web based system designed to help the preparation of export documentation for export produce (both Cut flower and fresh produce). It forms an integral part of overall KEPHIS regulatory activities which ensure products meets importing country standards as well as the Governments overall strategy of Vision 2030. It is an electronic system used to manage, maintain and view phytosanitary (plant health) certificate data and generate both paper based and paperless certificates for the trade of plants and plant products. It provides an assurance that the product being certified meets the importing country's requirements

Electronic Certification System Version 1.1 — Powered by Techno Brain

Now once client log on into system then by clicking on left menu, will be redirected to respective page. To create consignments/submit consignments client has to click on OverviewofConsignments.

The screenshot displays the user interface of the Electronic Certification System. At the top, there is a header with the KEPHIS logo and name, and a navigation bar with options like 'LogOut', 'Export Requirements', 'Pest Status', and 'My Profile'. The user's profile information is shown as 'Client ID : Pub/2010/t001' and 'Client Name : Tobacco trading Co'. A 'Main Menu' is visible on the left side.

The central part of the screen shows the 'OVERVIEW OF CONSIGNMENTS' table. The table has the following columns: Select, Invoice NR, Consignment ID, Application Date, Botanical Name, Destination, Status, Status Date, Total Weight, Certificate Type, SubmittedBy, Consignee, and UCR No. The table contains several rows of data, with one row highlighted in orange.

Select	Invoice NR	Consignment ID	Application Date	Botanical Name	Destination	Status	Status Date	Total Weight	Certificate Type	SubmittedBy	Consignee	UCR No.

2.2. Agent

Agent Logon is as below

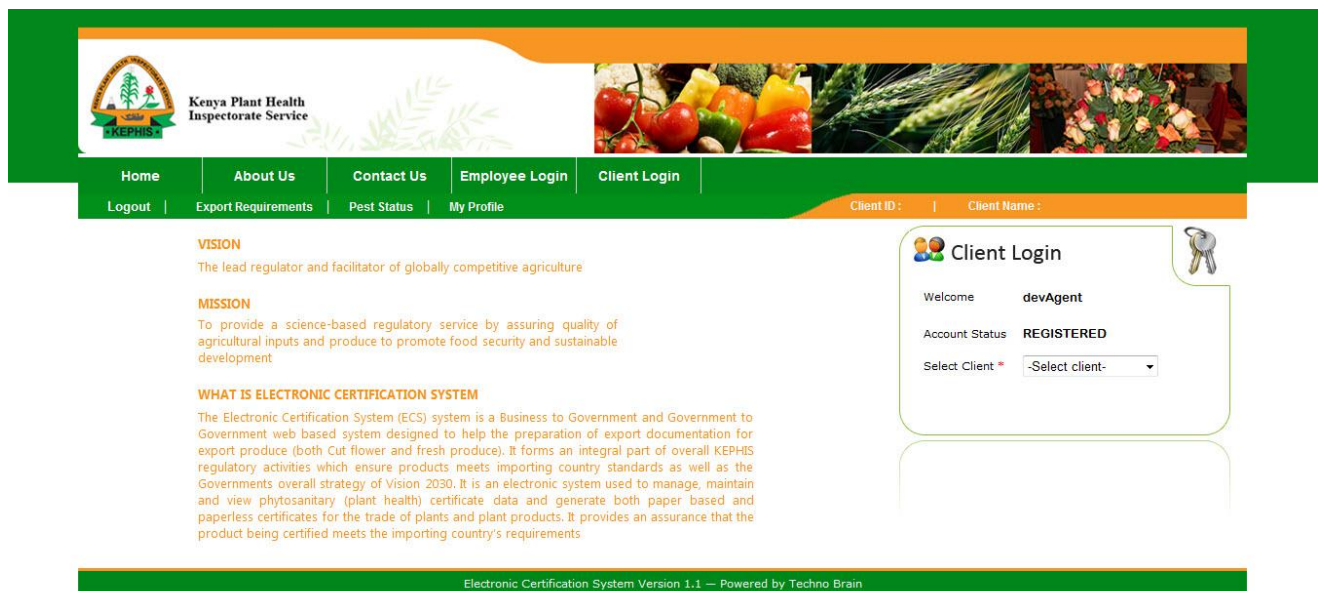

- ✓ Access the client login screen.
- ✓ Enter login details
- ✓ Selects client from drop down
- ✓ Clicks on continue

Now agent can create consignments for the selected client.

And agent name, client name will be displayed on the right top horizontal menu.

The screenshot shows the main interface of the Electronic Certification System (ECS). At the top, there is a navigation bar with the following menu items: Home, About Us, Contact Us, Employee Login, and Client Login. The main content area is divided into three sections: VISION, MISSION, and WHAT IS ELECTRONIC CERTIFICATION SYSTEM. On the right side, there is a 'Client Login' form with fields for 'User Name*' and 'Password*', a 'Logon' button, and links for 'Apply for Client Registration', 'Download Client Manual', and 'Forgot Password'. Below the main content, a footer indicates 'Electronic Certification System Version 1.1 — Powered by Techno Brain'.

The second screenshot shows the same interface after a successful login. The navigation bar now includes 'Logout', 'Export Requirements', 'Pest Status', and 'My Profile' in addition to the previous items. The 'Client Login' form is now populated with the following information: 'Welcome devAgent', 'Account Status REGISTERED', and a 'Select Client*' dropdown menu showing '-Select client-'. The footer remains the same: 'Electronic Certification System Version 1.1 — Powered by Techno Brain'.

VISION
The lead regulator and facilitator of globally competitive agriculture

MISSION
To provide a science-based regulatory service by assuring quality of agricultural inputs and produce to promote food security and sustainable development

WHAT IS ELECTRONIC CERTIFICATION SYSTEM
The Electronic Certification System (ECS) system is a Business to Government and Government to Government web based system designed to help the preparation of export documentation for export produce (both Cut flower and fresh produce). It forms an integral part of overall KEPHIS regulatory activities which ensure products meets importing country standards as well as the Governments overall strategy of Vision 2030. It is an electronic system used to manage, maintain and view phytosanitary (plant health) certificate data and generate both paper based and paperless certificates for the trade of plants and plant products. It provides an assurance that the product being certified meets the importing country's requirements

Main Menu

- Overview of consignments
- Overview of Submitted consignments
- Maintain Internal Users

This Role provides access to the client where he will be able to view the consignments submitted by him, the export status of the consignments. Also client can maintain the producers and consignees who falls under his section.

The overview includes the submitted consignments and their inspection status. The Client will be provided with the facilities to create new consignment, copy their details to the new consignment, edit, retract in case if needed .

The export status shows the consignment is valid for the export i.e whether it is fulfilling all the obligations, declarations, safeguards and the inspection result has made the consignment valid for exportation etc..

The maintenance includes maintaining the available producers and the consignees through whom the business operations of exportation happens.

2.4. KEPHIS EMPLOYEE SCREENS:

Once client submits the consignment the KPEHIS Employee work flow will start. Employee will logon as shown below with valid credentials.

Kenya Plant Health Inspectorate Service

Home | About Us | Contact Us | **Employee Login** | Client Login

VISION
The lead regulator and facilitator of globally competitive agriculture

MISSION
To provide a science-based regulatory service by assuring quality of agricultural inputs and produce to promote food security and sustainable development

WHAT IS ELECTRONIC CERTIFICATION SYSTEM
The Electronic Certification System (ECS) system is a Business to Government and Government to Government web based system designed to help the preparation of export documentation for export produce (both Cut flower and fresh produce). It forms an integral part of overall KEPHIS regulatory activities which ensure products meets importing country standards as well as the Governments overall strategy of Vision 2030. It is an electronic system used to manage, maintain and view phytosanitary (plant health) certificate data and generate both paper based and paperless certificates for the trade of plants and plant products. It provides an assurance that the product being certified meets the importing country's requirements

Electronic Certification System Version 1.1 — Powered by Techno Brain

- ✓ In this screen initially inspector will give inspection date and inspection report, by uploading a document from the file upload option.
- ✓ Then if needed inspector will create a field inspection before saving the inspection result.
- ✓ If the CoC is required for this consignment and client submitted those details. So now the inspector will give the validity of the COC in the respective field.
- ✓ By default if means of conveyance is SEA then validity will be 40 days and if by AIR then default will be 3 days.
- ✓ For any other type of conveyance can provide the validity here but not a mandatory.

Now inspector will pass the consignment or reject based on the inspection result. If passed then the consignment is ready for issuing the certificate.

Electronic Certification System Version 1.1 — Powered by Techno Brain

Kephis Employees can configure COC or Client Restriction or Process Variety Requests or Approve Storage Locations requested by Client. The below screens shows the some of the KEPHIS Employee screens which will give the above mentioned functionalities.

The screenshot displays the KEPHIS web application interface. At the top, there is a header with the KEPHIS logo and the text 'Kenya Plant Health Inspectorate Service'. Below the header, there are navigation links: 'LogOut', 'Export Requirements', 'Pest Status', 'Employee ID : 1', and 'Employee Name : James Aboge'. A sidebar on the left contains a menu with various options, including 'Approve Storage Locations' which is currently selected. The main content area is titled 'APPROVE STORAGE LOCATIONS' and features a table with the following data:

Select	Name Of Premises	Client Name	Physical Location	Start Date	End Date	Status
<input type="radio"/>	location2	Tobacco trading Co	lasifa	01/01/0001	01/01/0001	Approved
<input type="radio"/>	loca3	Tobacco trading Co	hyd	01/01/0001	01/01/0001	Approved
<input type="radio"/>	dsafasdf	KUDENGA LTD	dsagfadg	10/22/2014	10/30/2014	Approved
<input type="radio"/>	OLIJ 1	OLIJ ROZEN (K) LTD	OLIJ	01/01/0001	01/01/0001	Approved
<input type="radio"/>	harvest limited loc	HARVEST LIMITED	harvest	01/01/1901	10/11/2014	Approved
<input type="radio"/>	star flowers	STAR FLOWERS KENYA LTD	sadsaasdas	01/01/0001	01/01/0001	Approved
<input type="radio"/>	loca3	STAR FLOWERS KENYA LTD	star	10/23/2014	10/31/2014	Approved
<input type="radio"/>	shalimar	SHALIMAR FLOWERS K(Ltd)	shalimar flowers	10/03/2014	11/07/2014	Approved

Below the table, there is a section titled 'APPROVE STORAGE LOCATION DETAILS' with a note '* indicates required fields'. This section contains a form with the following fields:

- Client Name * (Dropdown menu with '-Select Client Name-')
- Name Of Premises* (Text input field)
- Physical Location* (Dropdown menu)
- Start Date* (Text input field)
- End Date (Text input field)
- Status* (Dropdown menu with 'Requested')

At the bottom of the form, there are five buttons: 'Add', 'Delete', 'Edit', 'Save', and 'Exit'. The footer of the application reads 'Electronic Certification System Version 1.1 -- Powered by Techno Brain'.
